elli

a simple statement of ethereal light and solid form.
Lighting that brings an aesthetic to architecture that is a balance of unique and classic, understated and bold, mechanical and sensual.

Design

elli, designed by Brent Markee, represents the most recent work that spans 20 years of lighting design. Inspired by design that finds beauty and simplicity in a pure and expressive statement of its function, elli is a coalescence of everything integral to the life and designs of Brent Markee.

Versatility

elli is a system of interchangeable parts that reflects the needs for simplicity and flexibility in lighting solutions. Choose from graduated shade sizes that fit all types of reflector lamps, a simple scone and a classic dish. Reflector lamps mount either rigid or on a swivel joint with a variety of tubing lengths. Swivel joints and fittings are fully adjustable but intended to be left in a fixed position after installation.

Construction

Timeless design, lasting construction; elli is made of heavy gauge solid brass and bronze and hand finished in oil rubbed bronze black. Lamps include medium base R lamps, PAR lamps and A lamps. Voltage is 120.
